

Click2Enter-I.V4 Door Control (DC) Technical Specifications Data Sheet For: Electromechanical Door Control

The new Click2Enter-I.V4DC (Door Control) is designed to support the installation of the Click2Enter, Inc. technology in electro-mechanically locked lobby door applications. The new kit includes the standard Click2Enter-I.V4 circuit board housed in a new lower-profile ABS enclosure, along with a Green (power) and Red (Activation) LED and a 2"x2" reflective C2E Shield for easy identification. This kit supports the installation of the C2E-I.V4 in the most discreet way possible. You can mount the lights into the jamb of the door to be controlled, or you can mount the lights into a blank switch plate on a zip box.

Some key features and specifications of the Click2Enter-I.V4DC are listed below:

- The enclosure is rated for **indoor use only**
- The size of the enclosure is 6" x 4 1/2" x 2 1/4"
- Mounting tabs are molded into the enclosure case
- A cord grip is included to support the low voltage wire installation
- The RED (Activation) and GREEN (Power) LED's are supplied so they can be mounted remotely at the entry door
- A small 2"x2" reflective sticker is supplied so it can be affixed at the entry door identifying that a Click2Enter-I.V4DC is installed
- Programming and operation is exactly the same as the C2E-I.V4 system
- The C2E-I.V4DC enclosure must be mounted in such a way as to not block RF signals
